### SUMMARY

I hold an MSc in Chemistry from Prince of Songkla University (2006) and a PhD in Chemistry from Karl-Franzens University, Austria (2011). Following postdoctoral and research leadership roles in metabolomics at Chalmers University of Technology (2011–2017), I co-founded and co-directed the Chalmers Metabolomics Centre (now the Chalmers Mass Spectrometry Infrastructure), providing national and international services (<https://www.chalmers.se/en/infrastructure/cmsi/>). Since joining Siriraj Hospital, Mahidol University in 2017 (Associate Professor since 2019), I have led a research team of over 30 members and established the SiCORE-MSB (<https://metsysbio.com/>). My research integrates advanced mass spectrometry, ion mobility mass spectrometry, imaging, and bioinformatics to investigate metabolism in health and disease, with applications in chronic kidney disease, aging, cancer, skin diseases, precision nutrition and medicine, and natural products.

I have published over 50 peer-reviewed articles, supervised numerous postdoctoral researchers and graduate students, and received multiple national and international grants and awards. I serve as an Associate Editor for a computational and structural biotechnology journal, review for several others, co-founded the Thailand Metabolomics Association (<https://thailand-metabolomics.org/>), and currently serve as Chair of the International Affiliations Task Group of the Metabolomics Society (since 2025; <https://metabolomicssociety.org/board-committees/other-society-task-groups/>).
